Internship Experience at PRP-WEBS :-

☐ During my three-month internship at PRP WEBS, I gained hands-on experience in web development and backend programming. I actively contributed to various projects, utilizing HTML, CSS, and JavaScript to develop and enhance website features, ensuring a responsive and user-friendly interface, Additionally, I gained valuable experience working with WordPress, customizing themes and plugins to meet specific client needs and improve website functionality. My role also involved working with Java Spring Boot, where I applied the collection framework of Java to efficiently manage data and streamline backend processes. This practical experience not only strengthened my technical skills but also honed my ability to collaborate within a team and manage project deadlines effectively. My contributions were recognized with a stipend reflecting the value of the work I delivered during the internship.

PROJECTS

Advertisement Application-	**Summarisation:** An application to create advertisement according to users input. Raw details input like theme , title, offers details, segment, place etc. are the key options available to create advertisement. It's user- friendly application and gives final template according to the inputs given. **Skill Used: Core Java, XML.**
Stone-Paper-Scissor GAME –	**Summarisation:** The intent of this idea is from trendy game which everyone used to play openly. To make it more attractive CSS is used. It's an online game between user and system. Based on user input, system will respond quickly and based on their match/mismatch result will be declared as "You Win" or "You Lose". **Skill Used: HTML, CSS, Java script, Java.**
